

DS800

DOLPHIN FOAM CARTRIDGE MULTIFEED SOAP SYSTEM

SPECIFICATION

- › Multifeed system can supply up to 8 foam soap dispensers
- › Uses 3.5 litre sealed cartridges – 10,000 shots approx per cartridge (bought in packs of 4)
- › Hand held shut-off connector used to connect new cartridge. Clicks in and out without exposing soap
- › Supply to each individual pump is gravity fed which reduces time taken to bleed the system. This greatly reduces install time and is achieved by installing a vent pipe at the end of the dispenser run
- › Vent pipe level indicator provides visual alert to change the cartridge.
- › Suitable for high and low traffic areas. Tried and tested in airports, small offices and large commercial buildings
- › For mounting under counter, behind hinged mirrors, in service duct or within cleaner's cupboard.
- › 2 litre reservoir (fixed collapsible container to continue supplying dispensers when cartridge finishes). This provides the confidence to fully drain every cartridge knowing the washroom will remain operational.

WIDTH	400 MM
HEIGHT	500 MM
PROJECTION	139 MM

WHY CARTRIDGE?

The Problem

- › Traditional bulk fill systems are at high risk of becoming contaminated and congealing due to exposure with environmental bacteria during the topping up process. (See report on product page for details of our lab testing)
- › Congealing in soap can block filters, gauzes and pipework rendering dispensers inoperable and requiring replacement. Once contaminated it is extremely difficult to eliminate symptoms.

The Solution

- › Sealed cartridges dramatically reduce the risk of bacterial contamination by removing the topping up process and the need to expose the soap.
- › A higher level of hygiene and reduced risk of congealing means the system and attached dispensers will maintain a higher efficiency/function for longer and require less maintenance.
- › Connecting a new cartridge is quicker, cleaner and avoids spillages that can occur when decanting soap from one container to another.

COMPATIBLE DISPENSERS

- › Panel mounted: BCL632F
- › Counter mounted: BC633F
- › Behind mirror: BCZ1596

PACK CONTAINS

- › 1 x wall mounted multifeed system
- › 1 x complimentary starter 3.5 litre refill cartridge – 10,000 shots approx (bought in pack of 4 ongoing)
- › 1 x vent pipe
- › Pipework & fitting packs (quantity dependent on number of soap dispensers required)
- › Dispensers not included – order separately

COMPLIANCE & CERTIFICATION

- › The DS800 used in conjunction with compatible foam soap dispensers meets the requirements outlined in WELL v2 2018 by IWBI (International WELL building Institute)
- › Section Water, W08 Handwashing, Part 2A
- › WELL is a building standard with an aim to improve global health by transforming the spaces where people spend their lives. Research and evidence based.
- › Pending UK Patent Application No. 1314060.3
